prompt:

Create a simple interactive web interface using HTML, CSS, and JavaScript.

Requirements:

- The page title should be "Group Idea Board".
- At the top, display a blue header with the title centered.

Interface components:

1. A dropdown menu labeled "Select your name..." with sample names (Nimal, Sara, Alex).
2. A text input field with placeholder text "Enter your idea here..."
3. A button labeled "Add Idea".

Functionality:

- When the user selects a name and enters an idea, clicking "Add Idea" should add the idea to a list below.
- Each idea should display like:
  - Idea text – suggested by [selected name]

Example list items:

- Build a study planner – suggested by Nimal
- Start a podcast – suggested by Sara
- Organize a coding workshop – suggested by Alex

Design:

- Center the interface in the page.
- Use a card-style container with a light background.
- Rounded corners and subtle shadow.

- Use a blue theme for the header and button.
- The idea list should appear as bullet points.

Make the layout responsive and clean.

Enhance the interface by adding:

- Better layout and spacing
- Colors or styling
- A clear list layout for ideas
- A visually appealing button design

The goal is to make the interface look clean and readable.

Enhance the interface further by adding at least two additional elements.

Examples include:

- A header section
- A footer
- A logo or icon
- A background design
- A section showing the total number of ideas
- A clear button to reset the input field etc...

add feature to add name too

add also add function to remove names
